## WALKIE - RECORDALL

8-Ib. SELF-POWERED
BATTERY RECORDER-PLAYBACK

-world's only recorder of its kind

General Services Administration
Federal Supply Service
Class 54 Part III Section B and Class 10.4 Par
Contractor: Miles Reproducer Co., Inc.
Period: July 1, 1955 through June 30, 1956
Contract No. GS-03S-17722
GSA Distribution Code 87

SOUND AMPLIFICATION SYSTEMS SINCE 1923

Executive Offices: 812 BROADWAY, NEW YORK 3, N. Y.

Telephone Spring 7-7670-1 • Cable Address: MILESMAN NEWYORK

# World's Only Recorder of its Kind WALKIE — RECORDALL

### 8-Ib. SELF-POWERED BATTERY RECORDER

specially designed to meet every need

IT'S ALL IN THE BAG

- RECORDS UNDETECTED IN OR OUT OF CLOSED BRIEFCASE
- · SENSITIVITY RANGE -- 60 FT. RADIUS
- · FULLY AUTOMATIC -- CONTINUOUS UP TO 4 HOURS
- · 2-WAY TELEPHONE RECORDINGS WITHOUT TAPPING WIRES
- · AUTOMATIC EQUALIZATION OF NEARBY AND DISTANT VOICES
- · OVERCOMES THE OBSTACLES OF CONFERENCE RECORDING
- VOICE ACTIVATED "SELF-START-STOP" ELIMINATES SUPERVISION
- · NO CONNECTING TO ELECTRIC SOCKET
- EVER—READY FOR "ON-THE-SPOT" RECORDINGS
- · INDEXED COMPILATION OF CASE HISTORY FILES

CASE HISTORY FILES: The unique indexing arrangement facilitates the compilation of permanent, unalterable recordings up to 4 hours (8 hours on both sides), accumulated at intervals, as well as the immediate selection for playback of any part of previously recorded text without re-winding delay. Time-consuming and expensive transcriptions may be eliminated by direct reference to Sonabands, the low cost, compact, easy-to-file recording Medium.

**OPERATION:** From self-contained batteries, Power pack for optional operation from 110 volts AC if battery preservation is desired. No tube warm-up delay. Completely vibration-proof.

SAME UNIT records and plays back instantly and permanently at any desired speed, on the same or a similar unit of the same capacity.

**START-STOP:** By mere turn of a concealed knob, by remote foot-control or automatically by Voice-Activation.

SINGLE THREE-POSITION CONTROL: A single bar switch controls recording, playback and lifting stylus to replace Sonaband.

RECORDING-LEVEL INDICATOR: A neon flasher indicates proper recording level.

STYLUS: A permanent, jeweled-tip stylus used for recording and playback never needs replacement.

TRANSCRIPTION FACILITIES: Built-in loudspeaker; jack for earphone or external loudspeaker; groove-finder; speed, volume and tone controls; manual and remote foot controls for "start-stop" and "back-spacing". Where separate transcribers are desired, Models "LC" and "LC4" are recommended.

INDEXED RECORDINGS: Indexed groove finder permits immediate playback of any part of recorded text without rewinding delay. Any part of a 4 hour recording can be exactly located within a split second to a maximum of 3 seconds.

MICROPHONE: The ultra-sensitivity of Walkie-Recordall eliminates need for handling microphone which may be concealed in or out of closed briefcase and reduces the excessive need for multiple microphone set-ups for recording at long range. More than one microphone with extended cable and Miles "M3" connector may be used for remote points.

MONITORING DURING RECORDING with Miles earphone which may also be used for playback.

TELEPHONE RECORDING: Recording telephone conversations with Walkie-Recordall may be made by using Miles Telemike which makes no physical contact with telephone (desk or wall type) or its wires. Incoming and outgoing voices are automatically equalized.

COST OF STANDARD BATTERIES: \$4.00 per set (approximately  $l \not \in P$  per operating hour).

LIFE OF BATTERIES: Flashlight cells last 100 work-hrs. "B" radio battery lasts 350 work-hrs.

COST OF PERMANENT, UNALTERABLE RECORDINGS: Sonaband having a recording capacity up to 8 hrs. costs 25¢

IDENTIFY with china marking pencil.

FILE: The compactness of Sonabands permits easy filing and storage in a minimum of space. Metal filing container measures 1"x3"x6" and holds 150 hours of recording.

MAIL: First class for 3¢; airmail for 6¢ in Miles Mailers.

- Recordings can be made noiselessly, in or out of closed briefcase containing hidden mike anytime, anyplace (no motor cranking required) while walking, riding or flying.
- Interviews, conferences, lectures, case histories, market research, hearings, depositions, testimony, agreements, library reports, 2-way telephone conversations, dictation (including whispers).
- Permanent, unalterable, indexed recordings at only 3¢ per hour.

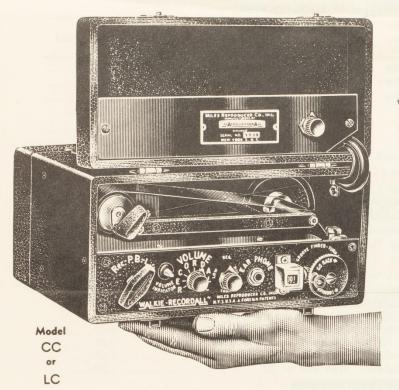

#### Item 54-M-31752 ITEM 54-M-31790-100

## MILES WALKIE-RECORDALL

### SELF-POWERED LIGHTWEIGHT BATTERY RECORDER-PLAYBACK

#### DESCRIPTION:

Walkie-Recordall: Self-powered light-weight battery recorder-playback with microphone and built-in loudspeaker ready to make "On-the-Spot" recording for instantaneous and permanent playback on the same or similar type unit of same capacity. Built-in Pre-amplifier and Automatic Volume Control (in all Models except Models "LC" or "LC4").... Voice Equalizer, Limiter and Expander... External "On-Off" Switch. . . . Three-position Lever Control for Recording ("Rec"). Playback ("PB"), and Lifting ("Lift") Stylus when replacing Sonaband or when going back or forward. . . . Volume, Tone and Speed Controls. . . Neon-Flasher. . . . Recording Sound-Level Indicator. . . Groove Indicator and Finder. . . "Near-End of Recording" Warning Light. . . . Automatic Stop at end of recording. . . Battery-Driven Motor requiring no cranking or winding. . . Battery Compartment in lid of case. . . . Jack for Earphone for Monitoring during recording or for private listening to playback during which time the built-in loudspeaker shuts off automatically. . . . Self-Lubrication. . . Sonabands Go "On-Off" in a jiffy.

#### SOME OPTIONAL ATTACHMENTS — SEE PRICE LIST FOR DETAILS

- 1. Foot pedals for "Start-Stop" and/or for "Go-Back".
- Voice-activated "Self-Start-Stop" for eliminating supervision.
- 3. Power Pack for optional operation from 110 volt AC.
- Receptacle and cable to connect to heavy-duty batteries lasting 1000 work-hours.
- 5. Additional multi-microphone connections.

- 6. Telemike for 2-way telephone recordings.
- 7. Additional external loudspeaker.
- 8. Earphone
- 9. Contact or wall-type microphone.
- 10. Midget leather-covered microphone for pocket or lapel.
- 11. Provision for continuous 24-hour recording.
- 12. Miles patented Briefcase.

#### BRIEFCASE RECORDER-PLAYBACK

Models "CCB" and "CC4B" are the same as Models "CC" and "CC4", respectively, but equipped with Miles patented Briefcase designed specially for recording with bag closed. Briefcase has provision for concealing microphone and a concealed opening to facilitate "Start" and "Stop" for recording "On-the-Spot".

#### SENSITIVITY RANGE:

Models "CC", "CCB", "CC4" and "CC4B" have a sensitivity range within a radius of 60 ft. from microphone in or out of closed briefcase. Models "LC" and "LC4" have a sensitivity range within a radius of 4 ft., being designed for talking close to the microphone.

#### RECORDING CONTINUITY

Models "CC", "CCB" and "LC" have an uninterrupted recording continuity of 90 minutes with a total recording capacity of 3 hours on each Sonaband (90 minutes on each side). Models "CC4", "CC4B" and "LC4" have an uninterrupted recording continuity of 4 hours with a total recording capacity of 8 hours on each Sonaband (4 hours on each side).

#### VOICE-ACTIVATED "SELF-START-STOP"

This control automatically and instantly starts the recording as soon as voice or signal comes through the microphone or telephone. Recorder stops automatically within 6 to 10 seconds after voice or signal stops. This fully automatic control assures maximum recording capacity on the recording band by eliminating the recording of silent periods and dispenses with the need for monitoring and supervision. On special order, this control ("VC") may be supplied at extra cost. When so ordered with 4 hour models, it is built into the unit. For 90 minute models it is supplied as an extra plug-in unit which will fit in the briefcase.

#### SONABANDS:

Endless, safety-film bands on which the recordings are made, go on and off the recorder in a jiffy. Sonabands are self-aligning and provide unalterable, indexed recordings up to 4 hours at a cost as low as 3¢ per hour. Sonabands are resistant to weather, water, dust, shrinkage and combustion. A case history file may be compiled of Sonabands. Transcription may be completely eliminated by direct reference to Sonabands.

No Heavy Load . . No Bulk . . No Wires . . No Reels
